

Instruction: Draw what it will look like after being roasted by fire.
Agent_Instruction: Transform the same large block of raw red meat into a roasted meat with browned, seared exterior and cooked texture. Do not alter rosemary sprig, green herbs, or background.

Instruction: Draw what it will look like after being exposed to the sun for one hour.
Agent_Instruction: Transform the same two scoops of chocolate ice cream into a melted, dripping chocolate slush losing its spherical shape. Do not alter the waffle cone.

Instruction: Draw what it will look like after many people have walked on it.
Agent_Instruction: Transform the same pristine white snow covering the lawn into trampled snow with numerous footprints and tracks. Do not alter the brick house, snow-covered trees, or background.

Instruction: Draw what it looks like three seconds after being punctured.
Agent_Instruction: Replace the soccer ball in the center foreground on grass with a deflated soccer ball flattened on the ground in the same position. Keep the rest of the scene unchanged.

Instruction: Draw what it will look like after being shattered by a hammer.
Agent_Instruction: Transform the same tall white porcelain vase with a green pine tree design into pile of broken ceramic shards and fragments scattered on the surface. Do not alter the grey gradient background or the white surface.

Instruction: Draw what it will look like when photosynthesis stops for a long time.
Agent_Instruction: Transform the same green leafy peace lily plant with a white flower (Good) into a withered, yellowing, and browning plant indicating death or severe stress (Good). Do not alter the white ceramic pot, the window frame, or background.

Instruction: Draw the scene after being hit by a meteor.
Agent_Instruction: Replace the desert landscape and small airport structure center and upper-left area with a massive impact crater with destroyed buildings and debris in the same position. Keep the rest of the scene unchanged.

Instruction: Draw the result after adding water to the powder(anhydrous copper(II) sulfate powder).
Agent_Instruction: Replace the pile of white powder center of the glass dish with a blue hydrated copper(II) sulfate in the same position. Keep the rest of the scene unchanged.

Instruction: Draw its appearance after it has been subjected to intense heating and then quickly placed into cold water.
Agent_Instruction: Replace the glass milk bottle in the center foreground with a shattered glass bottle with visible cracks and broken shards in the same position. Keep the rest of the scene unchanged.
